DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13 and 29, drawn to a display device and method of making the display device, classified in class 359, subclass 296.
- II. Claims 14-28, drawn to a method of making a capsule for a display device, classified in class 359, subclass 290.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the capsule of the display device can be made by another and materially different process, such as applying pressure to the capsule to develop the shape of the capsule, as opposed to pulling one portion from another portion of the capsule.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
